

Sustainable Development Indicators

These indicators are based on Agenda 2030, the universal 17 UN Sustainable Development Goals

Sources:

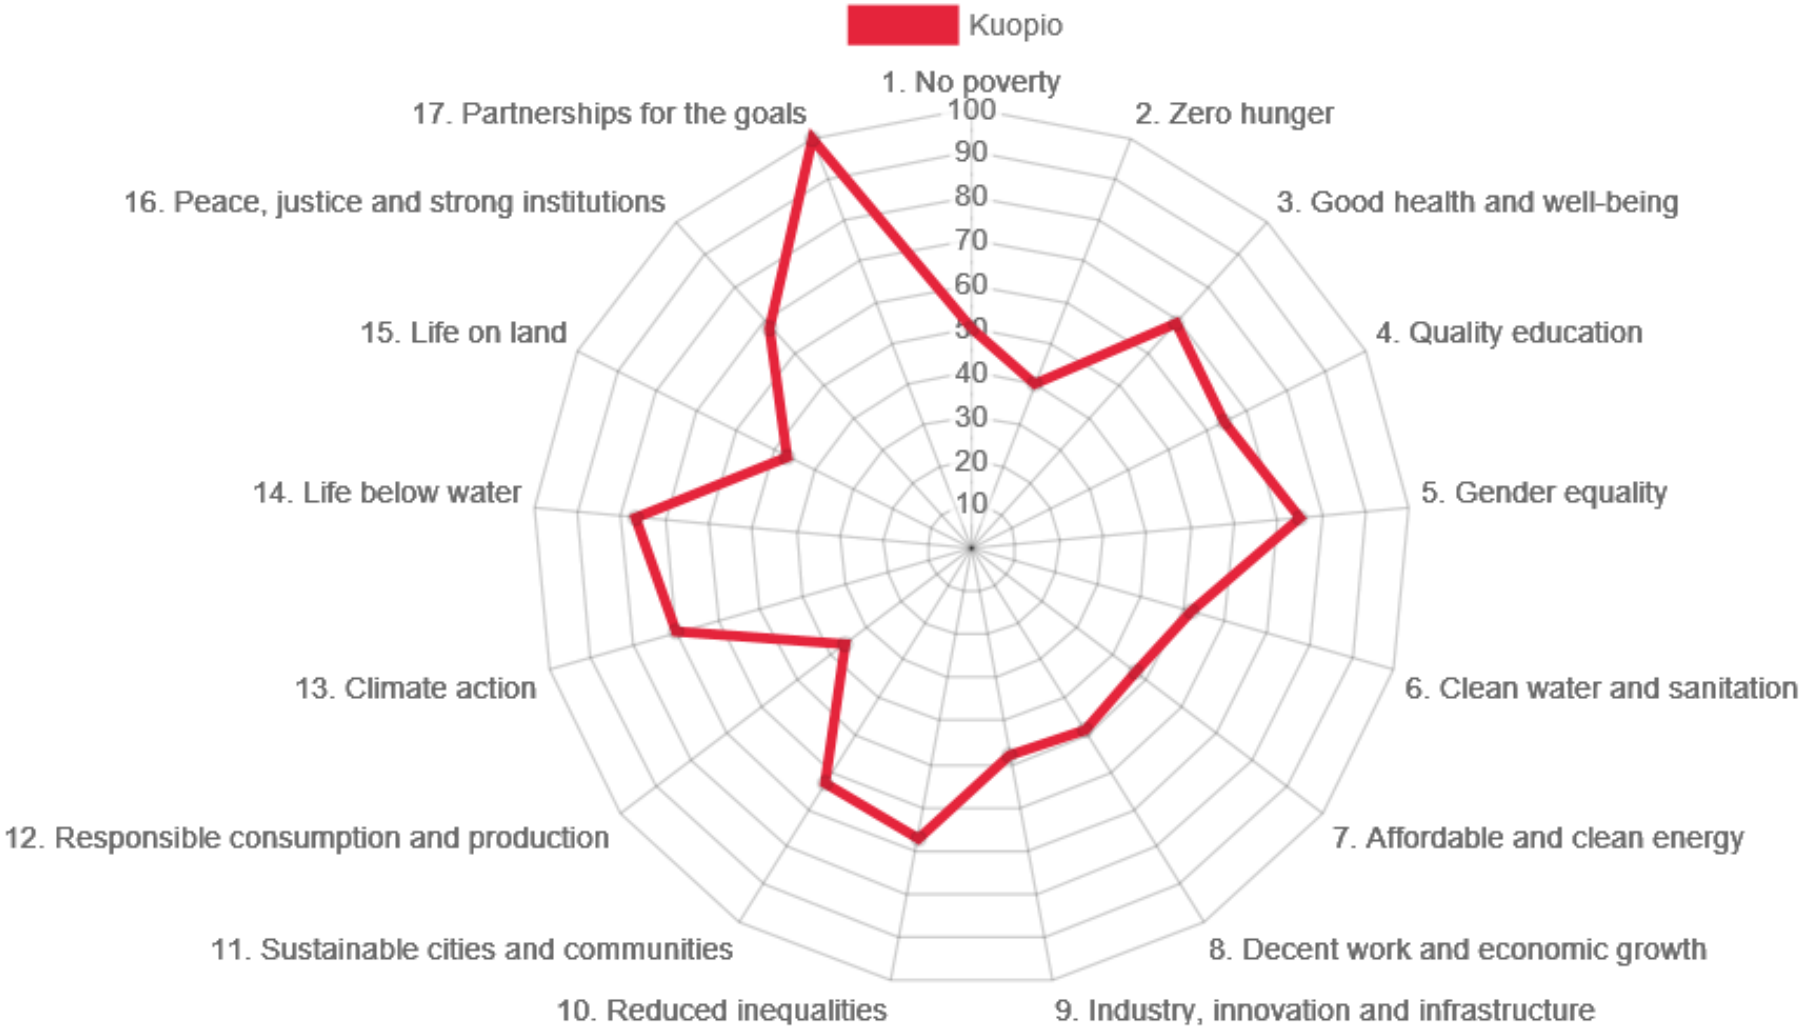

<https://MayorsIndicators>

MayorsIndicators offers city-specific data and ranks cities according to their performance in sustainable development. The map below shows the total score for each city, based on a score for each Sustainable Development Goal.

City of Kuopio

Sustainable Development Goal

The radar chart shows the overall performance towards each Sustainable Development Goal.

Sustainable Development Indicators

Residential energy consumption per capita

2017 9,97 MWh ↓
(2015 10,08 MWh)

150
Electric citybikes

Carbon sink potential
Forests and marshland 70 %
Agricultural soils 10 %
of all land areas

GHG emissions per capita

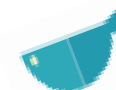

2016 5,23 t CO2 ↓
(2010 8,49 t CO2)

Air quality in Maaherrankatu
Annual concentration cap of respirable particles

2018 12,68 µg/m³ ↓
(2010 16 µg/m³, limit value 40)

Public transport
6,4 milj. trips ↑
2018

Ecological status of lakes

(some 900 lakes)
GOOD = 4,02
(score 0-5)

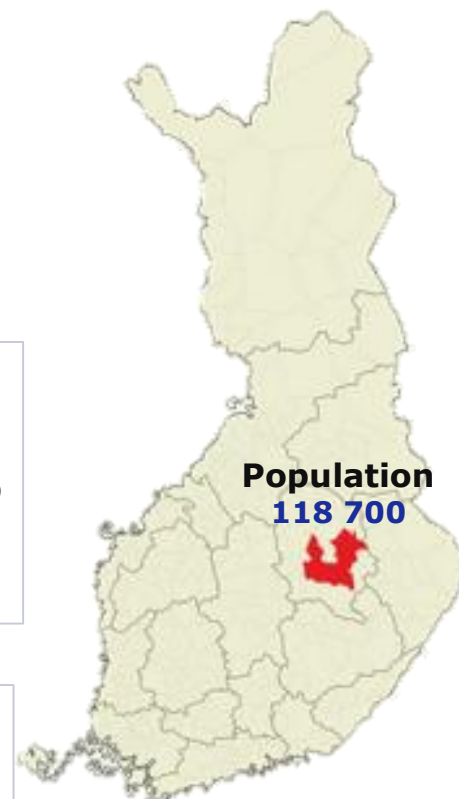

Private cars per capita

2017 0,46 ↑
(2011 0,44)

Level of wastewater treatment

3, maximum
(score 0-3)

Renewable energy sources

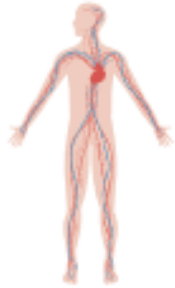

61 %

Wind power capacity
0 kW/as.

Sustainable Development Indicators

Disease index

The national average disease index value is 100

2017 115,4 ! ↓
(2010 115,9)
